Chip and/or Jim

Do you need those nifty waterproof maps or one-pagers for the boat tour? Let me know so I can get them produced.

Barbara

Carrie

If we're leaving from the Portland Spirit dock near OMSI, we have generally looked just a bit at the downtown reach, jetted up to the Broadway Bridge (upstream end of the study area, could look at the RM 11E area of elevated PCBs), head down the east side to Swan Island Lagoon to look at the shipyard (cruise a little ways into the lagoon), head up to McCormick & Baxter to stop and chat a bit about M&B and Willamette Cove, point out Cathedral Park & public dock/access, jet down to the Port's T4 slips, check out the International Slip. Depending on how we're doing for time we could jet up to the confluence with the Columbia (pointing out OSM & the Slough, or skip that and just check out the head of Multnomah Channel, and start working our way back upstream - generally stopping for a bit off of BP Arco, NW Natural, Arkema, Willbridge and Gunderson. The crews have generally been pretty flexible & willing to adjust on the fly.

Any other highlights you think of we could add to or substitute for the stops above.

Chip

Chip and Jim,

Thanks to you both for agreeing to help guide the Portland Harbor Superfund Site tour for the upcoming SETAC meeting. We are scheduled to go out November 8 from 12:30 - 2:30 pm on the Outrageous jet boat (with Portland Spirit). At this point we have 21 people signed up to attend. I will also be there to help coordinate so I'll look forward to seeing you both again soon!

We need to let the Portland Spirit folks know what our "cruise route" will be, including any stops or specific areas we would like to visit. I'm not sure what we've done in the past for site tours, but if you could give me a general sense of what to tell them before October 22nd that would be great.

I've copied the other SETAC folks who are coordinating this event so now we are all in touch. Let us know if you have any questions and thanks again for agreeing to help out!

Kind Regards,
Carrie
